🔗 Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven Senior Applications Analyst / Software Engineer with over 12 years of experience supporting, optimizing, and enhancing mission-critical enterprise applications across Oil & Gas, engineering, and operational environments. Proven expertise in enterprise systems support, L2/L3 incident resolution, root cause analysis, controlled releases, stakeholder engagement, and business process optimization. Strong background in application development, cloud platforms, enterprise integrations, and operational reporting. Adept at aligning technical solutions with business needs, ensuring application reliability, service continuity, and measurable operational improvement. Recognized for delivering scalable solutions that improve efficiency, strengthen data integrity, and support high-performing operational teams in dynamic, business-critical settings.

CORE COMPETENCIES

- Enterprise Application Support & Operations
- Technical Applications Management
- L2/L3 Incident Resolution & RCA
- Change & Release Management
- Stakeholder Engagement & Vendor Coordination
- Business Process Optimization
- Enterprise Data Management & Reporting
- Application Enhancements & System Integration
- Oil & Gas Operational Systems
- Cloud Platforms & Infrastructure Support
- Service Reliability & Performance Monitoring
- Documentation, Audit Readiness & Compliance
- Data Manipulation/Fixes, Workarounds & Operational Reporting
- System Configuration, Installation, Reconfiguration & Release Support

---

TECHNICAL SKILLS

- **Core Stack:** C# (.NET 3.1 - 10, ASP.NET Core MVC, Web API, Razor, Blazor, SignalR, WPF, Windows Forms, WebView2), Java (JavaFX, Servlet, JSP, Spring Boot, MVVM with FXML), Python (GeoPandas, PyQGIS, ArcPy), JavaScript/TypeScript, PHP (Laravel/Symfoni).
- **Game Development & Graphics: MonoGame (XNA Successor)**, Unity, HLSL (Shaders), 2D/3D Rendering Pipelines, SpriteBatch Optimization, **Helix Toolkit**, OpenGL/DirectX concepts, Goddot

- **Authentication, Authorization & Security:** Keycloak, OAuth2 & OpenID Connect, JWT Authentication (Access + Refresh Tokens), Microsoft Entra ID, Okta, Duende IdentityServer, Role-Based, Policy-Based Authorization
- **Geospatial Tech:** PostGIS, QGIS, ArcGIS, Leaflet.js, GeoServer, Google Earth Engine, NetTopologySuite.
- **Cloud & DevOps:** Microsoft Azure (App Services, Blob Storage), Docker, Kubernetes, CI/CD (Azure DevOps, GitHub Actions).
- **Architecture:** Microservices, Vertical Slice Architecture, DDD, CQRS, MVVM, SOLID Principles.
- **Data & AI:** SQL Server, PostgreSQL, Redis, Scikit-learn (Anomaly Detection), Entity Framework Core.
- **Object-Relational Mappers (ORMs): .NET (**Entity Framework Core, Dapper, Fluent NHibernate), **Java(** JPA, Hibernate)

PROFESSIONAL EXPERIENCE

Cyphercrescent Limited — Software Engineering Lead

Port Harcourt, Nigeria | 04/2019 – Present

Lead engineering and enterprise application support initiatives for business-critical Oil & Gas systems, ensuring operational continuity, performance optimization, and alignment with stakeholder requirements.

Day-to-Day Responsibilities

- Monitor, maintain, and optimize enterprise applications supporting operational and financial workflows.
- Investigate production incidents, troubleshoot application issues, and perform root cause analysis for recurring problems.
- Deliver controlled fixes, patches, and system enhancements while minimizing business disruption.
- Collaborate with business users, analysts, and technical teams to gather requirements and improve application functionality.
- Oversee deployments, testing cycles, and post-release validation for enterprise systems.
- Maintain technical documentation, operational procedures, and knowledge repositories.
- Provide user support, training, and guidance for effective adoption of systems.

Key Achievements

- Reduced technical debt and improved maintainability through architecture modernization initiatives.
- Implemented AI-enabled features that enhanced predictive insights for operational assets.
- Streamlined deployment pipelines, significantly improving release speed and reliability.
- Delivered multiple enterprise platforms supporting production monitoring, planning, and integrity management.

Energy Infrastructure Real-Time Detection & Reporting System — **Senior Applications Analyst** (Project: GeoBunkerTrace) | **Tantita Security Services Nigeria Limited**

Nigeria | 2024 – 2025

Led development and operational planning for a strategic intelligence platform focused on infrastructure monitoring and anomaly detection.

Day-to-Day Responsibilities

- Coordinate system design, technical execution, and stakeholder reporting.
- Monitor platform modules, resolve issues, and improve operational workflows.
- Support integration between geospatial systems, databases, and AI-driven services.
- Manage access control, data validation, and secure communication channels.
- Maintain deployment standards and ensure service availability.

Key Achievements

- Architected scalable monitoring modules for real-time infrastructure intelligence.
- Integrated predictive analytics to support anomaly detection and operational decision-making.

Symphony Solutions — Senior Software Engineer (Contract)

Remote (USA) | 09/2022 – 04/2023

Supported enterprise-grade application modules with a focus on performance, reliability, and user experience.

Day-to-Day Responsibilities

- Resolve technical issues affecting application functionality and performance.
- Implement enhancements based on stakeholder and user feedback.
- Support testing, deployment, and validation of new features.
- Maintain code quality standards and system documentation.

Key Achievements

- Improved rendering performance and system responsiveness.
- Strengthened testing practices, reducing defects in production.

Silkflo Limited — Azure Software Engineer (Contract)

Remote (London, UK) | 04/2022 – 09/2022

Contributed to enterprise platform delivery with focus on cloud-hosted application services.

Day-to-Day Responsibilities

- Support backend services, integrations, and operational reliability.
- Collaborate with teams on deployment, monitoring, and incident resolution.
- Maintain scalable architecture aligned with tenant requirements.

Key Achievements

- Delivered distributed service components for enterprise-scale operations.
- Improved system scalability and deployment efficiency.

GIS Transport Limited — GIS Software Developer

Kaduna, Nigeria | 05/2017 – 05/2019

Developed and supported business applications with spatial intelligence capabilities.

Day-to-Day Responsibilities

- Maintain and enhance operational systems for mapping, reporting, and customer workflows.
- Troubleshoot issues, optimize databases, and support end users.
- Deliver reporting tools and automate operational processes.

Key Achievements

- Improved service efficiency through workflow automation.
- Built systems that reduced manual overhead and strengthened operational visibility.

EDUCATION

M.Sc. Software Engineering & Technology — Energy Technology Institute, Uniport (2025)
BSc. Ed. Computer Science — Ignatius Ajuru University of Education (2012)

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect (2024)
- AWS Certified Solutions Architect – Associate (2024)
- GIS & Remote Sensing Certification – Esri (2021)

PUBLICATIONS

1. Advancing Secure Cognitive Automation in Upstream Operations: A Case Study on Artificial Intelligence Deployment Using CypherCrescent's SEPAL Enterprise Planning Solution (EPS) Platform (2026)
2. A Spatial Intelligence Framework For Real-Time Detection And Reporting Of Illegal Oil Bunkering In The Niger Delta (2025)
3. Cross-Categorical Business Analytics and Evaluation System for the Nigerian Oil and Gas Industry (2021)
